

## DIE CAST TOOLING

# For Today and Tomorrow

## Alloys Tooled

- Aluminum
- Magnesium
- Zinc

## Advantages

- Creative Tooling Design
- Rapid Deliveries
- Global Pricing

## The Future

- Magnesium is the alloy of the future
- Anderson Global + General Die & Engineering = Experience with Magnesium and Automotive

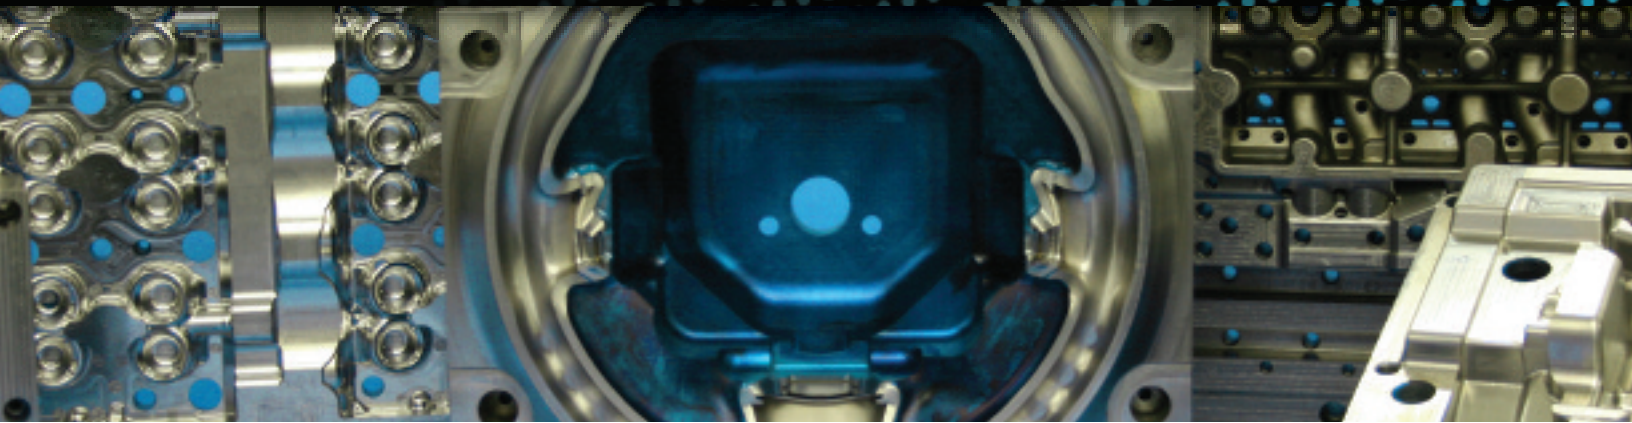

## Specialties

- Full Instrument Panels
- Cylinder Blocks
- Transmission Components
- Suspension Components
- Compressor
- Full Rear Lift Gates for Vehicles

## Markets Served

- Automotive
- Trucking
- Marine
- Appliance

# Innovative Tooling Solutions

## Products

- Tooling for precision sand
- Tooling for hot and cold core boxes
- Tooling for Disa
- Tooling for die cast
- Tooling for forging

## Benefits

- Tooling designed for lower scrap rate and higher run rate
- Tooling with global content for best possible value
- Tooling with short lead times
- More profits for our customers

## Why Anderson

- Rapid turn-around
- Global pricing
- Service after the sale

## Services

- Creative engineering solutions
- Laser scanning
- Reverse engineering
- Globally supplied
- Alliance partners for large turn-key projects
- Process consultation
- Lean manufacturing training
- Automation
- Gating simulations
- Core blowing simulations
- Casting process development
