

The Power of Forging

Processes

- Close Forging
- Hammer
- Up Setter

Products

- Rollers
- Forming Dies
- Trimming Dies
- Coining Dies
- Fixtures

Markets Served

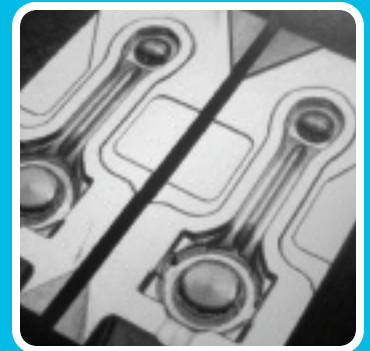

- Automotive
- Trucking

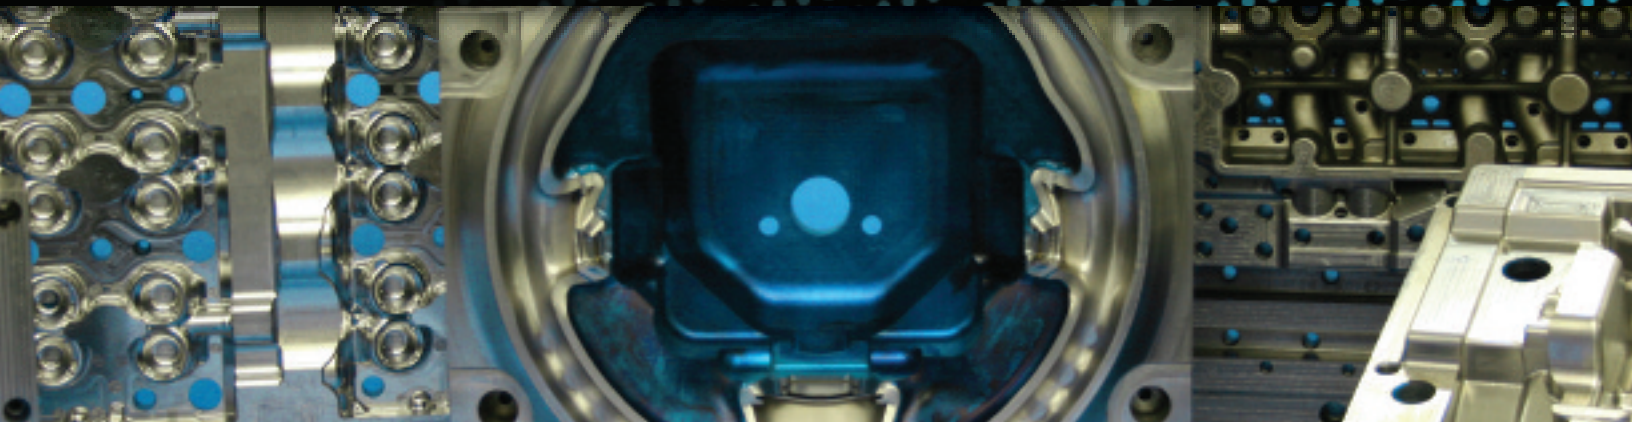

Advantages

- High speed machining for accuracy and surface finish
- Fast manufacturing response
- Price advantage for NAFTA
- Experience in a wide variety of products and processes

Specialties

- Front Axle I-Beam
- Crankshafts
- Steering Knuckles
- Axle Shafts
- Hypoid Pinions
- Yokes
- Con Rods
- Bolsters

Innovative Tooling Solutions

Products

- Tooling for precision sand
- Tooling for hot and cold core boxes
- Tooling for Disa
- Tooling for die cast
- Tooling for forging

Benefits

- Tooling designed for lower scrap rate and higher run rate
- Tooling with global content for best possible value
- Tooling with short lead times
- More profits for our customers

Why Anderson

- Rapid turn-around
- Global pricing
- Service after the sale

Services

- Creative engineering solutions
- Laser scanning
- Reverse engineering
- Globally supplied
- Alliance partners for large turn-key projects
- Process consultation
- Lean manufacturing training
- Automation
- Gating simulations
- Core blowing simulations
- Casting process development
