

The Strength of Alliances

Advantages

- A group of like-minded companies that work together as a single entity will bring your big projects in on time and under budget
- The cost savings of your purchasing and engineering staff monitoring one entity versus 3 or 4 on a major project is very substantial

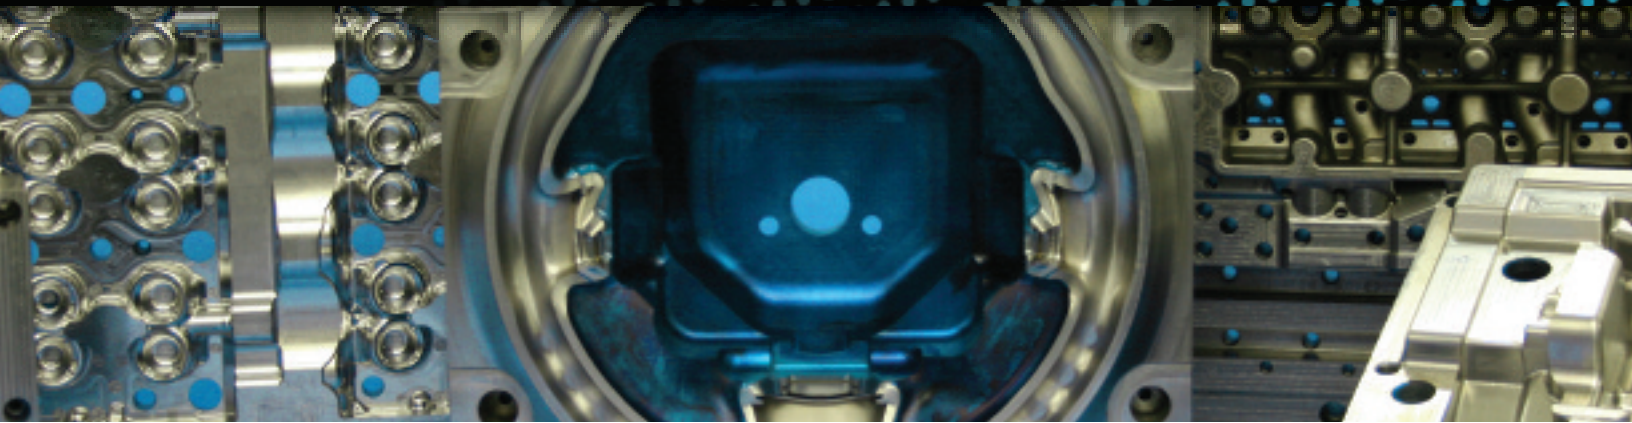

Markets Served

- Automotive
- Trucking
- Beverage
- Military
- Casting
- Forging
- Machining
- Automation
- Global

Successful Alliance Projects

- Complete turn-key intake manifold foundry
- Complete turn-key, low-pressure aluminum cylinder head installation
- Complete "process development" foundry with:
 - Low pressure sand
 - Large blown cores
 - SPM for heads
 - Metal pump – roll over for blocks
 - Multiple cold box resins

Innovative Tooling Solutions

Products

- Tooling for precision sand
- Tooling for hot and cold core boxes
- Tooling for Disa
- Tooling for die cast
- Tooling for forging

Benefits

- Tooling designed for lower scrap rate and higher run rate
- Tooling with global content for best possible value
- Tooling with short lead times
- More profits for our customers

Why Anderson

- Rapid turn-around
- Global pricing
- Service after the sale

Services

- Creative engineering solutions
- Laser scanning
- Reverse engineering
- Globally supplied
- Alliance partners for large turn-key projects
- Process consultation
- Lean manufacturing training
- Automation
- Gating simulations
- Core blowing simulations
- Casting process development
